

WE'RE HIRING

EXPERIENCED REACT / FULL STACK DEVELOPER

£45,000 - £55,000

We're looking for a passionate developer, who's eager to get stuck in, learn new and exciting things, and make an impact.

SKILLS REQUIRED

- JavaScript
- Framework experience of Nest and React (including Native) and visibility of other emerging technologies
- Experience and a love of other languages
- Database use and integration; we'd love it if you know your way around a schema
- All those surrounding tools that make your life complete (including Docker, git, TypeScript, cloud functions, *nix configuration and admin, headless CMS, build pipelines)

WHO ARE WE?

For 150 years we have been recognised as one of Yorkshire's top employers. We are now driving new technologies to enhance our IT capabilities and revolutionise the way our company operates across its diverse business model. This enables us to remain a front runner

We have now made Digital transformation a strategic priority, with dedicated space for innovation in our stylish new head office, overlooking Hull Marina. We have several new vacancies to service the demands of our ever evolving business.

If you like variety, emerging technologies, discussing challenges with knowledgeable individuals and working in an entrepreneurial environment then this is the opportunity for you.

This role will be mainly focused on our SaaS platform, Accountabl, which is building a world of better business through revolutionary FinTech.

WHO ARE YOU?

You'll know your Nest from your Next and Nuxt, when to Remix, be Solid or Svelte and want to mix things up a little. Plus, you'll have a proven history of working on both large-scale systems and small, personal projects just to prove that an idea works. As a front-end master you'll want more control over the back end and have a keen eye for design and detail, combining the best of both worlds.

You'll be equally at home, crafting a beautiful UI and experience that customers will love, to shaping big data, integrating internal and external APIs and making everything work without us even knowing you are there. But we'll know that you are there because you're one of us.

You've done some mobile development as well? Please do get in touch. We'd love to have a chat.
